

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

IMPORTANT NOTICE TO FORMER MONTHLY SUBSCRIBERS.

Henceforth, the subscription price of the MONTHLY will be *three dollars net to all non-members of the ASSOCIATION*.

The following adjustments are proposed for those subscribers who failed to apply for membership in the ASSOCIATION before April first.

(1) Any person who had already paid \$2.00 on the old basis for the year 1916 is asked to send *one dollar additional* to complete the subscription. If such a person desires also to become a member of the ASSOCIATION, an initiation fee of \$2.00 must now be paid.

(2) Those whose subscriptions for 1916 are entirely unpaid will now pay \$3.00 for the subscription or \$5.00 for membership in the ASSOCIATION, including the subscription.

In the case of subscriptions under (1) or (2) which expire *before* the end of 1916, please add *thirty cents extra* for each copy needed to complete the year. *Hereafter all subscriptions will date from January of each year.*

(3) An institution in which the Calculus is taught may become an *institutional member* of the ASSOCIATION by the payment of *five dollars* annually, which will entitle the library to receive *two copies of the MONTHLY* and the institution to send a voting delegate to all meetings of the ASSOCIATION. Institutions in which the Calculus is taught, whose libraries have already renewed their subscriptions for 1916, are asked to send *three dollars additional* and thus become institutional members of the ASSOCIATION.

Other institutions, and those not wishing to become institutional members, whose library subscriptions have already been renewed for 1916, are asked to send *one dollar additional* to complete the advanced price of the MONTHLY. No further subscriptions will be received at the old rate of two dollars, *and no discount from the advanced rate of three dollars will be allowed on subscriptions under any circumstances.*

(4) The obligations of the MONTHLY for 1916 will, of course, be fulfilled on the former basis in the case of any individual or institution whose subscription has already been paid, and who may decline to make the adjustment on the new basis, but it is hoped that all will comply, since even the advanced rate is only the actual cost of producing the journal.

(5) Please note that all subscriptions to the MONTHLY and dues in the ASSOCIATION are to be paid to the SECRETARY-TREASURER, Professor W. D. CAIRNS, 55 East Lorain St., Oberlin, Ohio.

Correlated Mathematics for High Schools

FIRST-YEAR MATHEMATICS FOR SECONDARY SCHOOLS

By E. R. BRESLICH, Head of the Department of Mathematics in the University of Chicago High School

An unusually successful text and one developed from actual classroom work covering a period of a dozen years continuously.

\$1.00, postage extra (weight 1 lb., 10 oz.)

SECOND-YEAR MATHEMATICS FOR SECONDARY SCHOOLS

By E. R. BRESLICH. To be published July, 1916

A text designed to carry forward the type of material of the first year. This book has had equally as rigid a test as the former.

Write for information or for examination copies with the privilege of return

Mathematical Wrinkles

A Source Book
for Math. Teachers

By S. I. JONES, B.Sc., B.Sc., Professor of Mathematics, Nashville Bible School, Nashville, Tenn.

"An exceedingly valuable mathematical work." "Novel, amusing and instructive." "We have seen nothing for a long time so ingenious and entertaining as this valuable work."—The Schoolmaster, London, England.

"A most useful handbook for mathematics teachers."—School Science and Mathematics, Chicago, Ill.

"A most convenient handbook whose resources are practically inexhaustible." "We cordially recommend the volume as the most elaborate, ingenious and entertaining book of its kind that it has ever been our good fortune to examine."—Education, Boston, Mass.

A Noteworthy Textbook

Bôcher's Plane Analytic Geometry

By MAXIME BÔCHER, Professor of Mathematics in Harvard University. xiii + 235 pp. 12mo. \$1.60.

This volume follows the Harvard traditional course in analytic geometry, which assumes that its one aim is to put the student into possession of an instrument which he himself can use in proving new geometrical theorems or solving new problems. The last two chapters are devoted to calculus.

Altho it appeared after the opening of the last Fall term, it has been adopted in the following colleges: Harvard University, New York University, Dartmouth College, Wesleyan University, Stanford University, Indiana University, University of Iowa, University of Texas, University of South Dakota, Northwestern University, University of Cincinnati, Rice Institute, Colorado Agricultural College, Baker University, Parsons College, Hamline University.

M. B. PORTER, *University of Texas*.—We shall use Bôcher this year with some of our classes.

G. A. MILLER, *University of Illinois*.—I looked it over with some care and was more favorably impressed than I had been by a similar examination of any other book on this subject. I believe that the book will be unusually teachable and will not be found difficult by the student in view of the clear statements and the good illustrative examples. I was especially well pleased with the discussions of the general equation of the second degree which is so frequently presented in an unsatisfactory manner.

ELIJAH SWIFT, *University of Vermont*.—Professor Bôcher's lectures were always very clear, and this book resembles his lectures. He seems to give the essentials of Analytics in a clear and satisfactory way.

W. C. BARTOL, *Bucknell University*.—I like it very much. It looks good for a freshman course in analytic geometry.

E. E. DECOUR, *University of Oregon*.—The book is attractive typographically, the material is well chosen and clearly presented, and the introduction of some of the more important applications of the differential calculus at the close will be both more interesting and more useful to the student than an elaboration of the analytic geometry.

CHICAGO, ILL.

SCHOOL AND SOCIETY

A weekly journal, which began publication on January 2, 1915, covering the field of education in relation to the problems of American democracy. Its objects are the advancement of education as a science and the adjustment of our lower and higher schools to the needs of modern life. Each number ordinarily contains articles and addresses of some length, shorter contributions, discussion and correspondence, reviews and abstracts, reports and quotations, proceedings of societies and a department of educational notes and news.

Annual Subscription \$3.00; single copies 10 cents

SCIENCE

A weekly journal, established in 1883, devoted to the advancement of the natural and exact sciences, the official organ of the American Association for the Advancement of Science. For twenty years SCIENCE has been generally regarded as the professional journal of American men of science.

Annual Subscription \$5.00; single copies, 15 cents

THE SCIENTIFIC MONTHLY

An illustrated magazine, devoted to the diffusion of science, publishing articles by leading authorities in all departments of pure and applied science, including the applications of science to education and society. Conducted on the editorial lines followed by *The Popular Science Monthly* since 1900.

Annual Subscription \$3.00; single copies, 30 cents

THE AMERICAN NATURALIST

A monthly journal, established in 1867, devoted to the biological sciences with special reference to the factors of organic evolution.

Annual Subscription \$4.00; single copies, 40 cents

AMERICAN MEN OF SCIENCE

A biographical directory, containing the records of about 5,500 scientific men. Price, \$5.00 net

SCIENCE AND EDUCATION

A series of volumes for the promotion of scientific research and educational progress.

Volume I. The Foundations of Science

By H. POINCARÉ. Containing the authorized English translation by George Bruce Halsted of "Science and Hypothesis," "The Value of Science," and "Science and Method."

Price, \$3.00 net

Volume II. Medical Research and Education

By RICHARD MILLS PEARCE, WILLIAM H. WELCH, C. S. MINOT and other authors.

Price, \$3.00 net

Volume III. University Control

By J. McKEEN CATTELL and other authors.

Price, \$3.00 net

We Cover the Earth

Here is the list of countries to which SCHOOL SCIENCE AND MATHEMATICS goes each month:

Every State in the United States, every Province in Canada, Mexico, Cuba, Porto Rico, Brazil, Argentine, Chile, Peru, Ecuador. Every country in Europe. Egypt, Liberia, Cape Colony, The Transvaal, Persia, Ceylon, India, China, Korea, Japan, Philippines, New Zealand, Australia, and Hawaii.

The only Journal in the English language devoted primarily to the needs of Science and Mathematics teachers in High Schools.

Remember this when deciding upon your subscription list of periodicals for Science and Mathematics.

Be a partner in this enterprise by investing two dollars (\$2.00) with it each year. Those teaching these subjects in Secondary Schools who wish to be progressive should be subscribers to this Journal.

During the last ten years it has accomplished more in placing Science and Mathematics teaching on its present high plane than any other agency.

Wide awake Mathematics teachers should have it to keep abreast of the times. Progressive Science teachers should read it to keep themselves alive in their subjects.

The best instructors in any subject are those broad enough in their pedagogical views to have a knowledge of what those in other subjects are doing.

SCHOOL SCIENCE AND MATHEMATICS is the only Journal through which you can receive this knowledge.

Fundamental Conceptions of Modern Mathematics

BY

ROBERT P. RICHARDSON

AND

EDWARD H. LANDIS

Cloth \$1.25 net

The subtitle of this book is "Variables and Quantities with a Discussion of the General Conception of Functional Relation." It is the first of a series projected to cover all the fundamental conceptions of modern mathematics.

The authors' treatment considers mathematics as a science rather than as an art. The three main topics are: Pure formalism as a science of symbols; the realities underlying mathematical formulae which gives an account of quantities and their classification; and the constitution of variables and the essential characteristics of the functional relation between variables.

The questions that come within the scope of this book are by far the most fundamental of all arising in mathematical science.

Open Court Publishing Company
CHICAGO AND LONDON

Publications of the American Mathematical Society

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY.

The Transactions is devoted to research in pure and applied mathematics and is the official organ of the Society for the publication of important original papers. Published quarterly. Subscription price for the annual volume, \$5.00.

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY.

Devoted largely to critical reviews of mathematical books, the Bulletin also contains reports of the meetings of the Society and of other mathematical bodies, short original papers, reports on progress in the science, lists of new publications, and notes on current events in the mathematical world. Published monthly, except August and September. Subscription price for the annual volume, \$5.00.

THE EVANSTON COLLOQUIUM LECTURES. Delivered at the Chicago Congress of Mathematics, 1893, by FELIX KLEIN. Republished by the Society, 1911. Price, 75 cents.

THE BOSTON COLLOQUIUM LECTURES. Delivered before the Society, Boston, 1903, by H. S. WHITE, F. S. WOODS, and E. B. VAN VLECK. Price, \$2.00.

THE NEW HAVEN MATHEMATICAL COLLOQUIUM. 1906. By E. H. MOORE, E. J. WILCZYNSKI, and MAX MASON. \$3.00.

THE PRINCETON COLLOQUIUM LECTURES. 1909. By G. A. BLISS and EDWARD KASNER. \$1.50.

THE MADISON COLLOQUIUM LECTURES. 1913. By L. E. DICKSON and W. F. OSGOOD. \$2.00.

Circulars sent on request. Address all orders to

American Mathematical Society

501 West 116th Street

New York City

The American Mathematical Society was organized in 1894 and includes among its 730 members nearly all the mathematicians of the United States. The annual dues are \$5.00; admission fee, \$5.00. Members receive the Bulletin without further charge, and are entitled to a reduced price on the other publications of the Society. Meetings are held ten times a year in New York, Chicago, and other cities. The Society has a library of over 5000 volumes.

The American Mathematical Monthly

OFFICIAL JOURNAL OF

The Mathematical Association of America

**Is the Only Journal of Collegiate Grade in
The Mathematical Field in this Country**

This means that its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.

The Historical Papers, which are numerous and of high grade, are based upon original research.

The Questions and Discussions, which are timely and interesting, cover a wide variety of topics.

The Book Reviews embrace the entire field of collegiate and secondary mathematics.

The Curriculum Content in the collegiate field is carefully considered. Good papers in this line have appeared and are now in type awaiting their turn.

The Notes and News cover a wide range of interest and information both in this country and in foreign countries.

The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake.

There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field: but the MONTHLY is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

Send for circulars showing the articles published in the last two volumes.

Sample copies and all information may be obtained from the
